

Meeting Two

What we know, what the children know, and how can we assess what they don't know

Date:

Attendees:

Discussion

Questions to discuss:

1. What do we think the children already know, and are confident in as per subject?
2. What do we think the children do not know? In what areas of their learning are they struggling?
3. What forms of assessment have we already taken? (formative assessments, written assessments, observation, whole class activities, one on one activities, etc)
4. What types of assessment can we do over the next few weeks to get evidence of what the children know and don't know? What main competency areas or subjects do we want to initially focus on?
5. How will we record these assessments to bring in the next meeting?
